Testimonials

“ We passed the audit! And **we were able to pass** because of the work you did on PA File Sight. Thank you very much.”

- Network Admin
RevTrak, Inc, USA

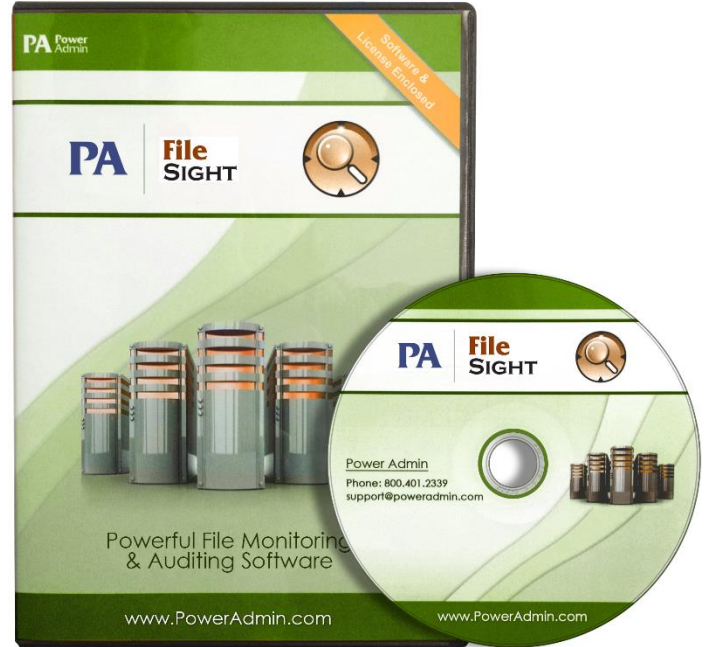

“ I must compliment you on your **excellent customer service and technical support**. Keep up the good work and I'll remain a customer for a long time!”

- IT Manager
Cornell University, USA

Introduction

PA File Sight™ enables you to see who is reading from and writing to important files on your server. If a file gets deleted, PA File Sight can tell you who did it, their IP address, computer name, and often what program they used.

PA File Sight's active file and folder auditing can be an important part of meeting standards such as HIPAA, Sarbanes-Oxley, ISO and the Payment Card Industry Data Security Standard (PCI-DSS).

Ransomware Protection

Detects ransomware attacks coming from the network and stops them. Supports honeypots and heuristics. Compromised computers are blocked from reaching files on other protected servers on the network.

Prevent Information Leaks

Detects users copying files, and optionally blocks access. Real-time alerts allow appropriate staff to investigate immediately. Requires Ultra features.

User	IP Addr
Mary	192.168.0.192
Hank	192.168.0.141
Eva	192.168.0.189

Audit File Access

Audits who is deleting files, moving files or reading files. Often used for compliance purposes. The Ultra version will record this to a database for rich reports.

Testimonials

“Very happy with the app so far, it blows away [a major competitor].”

-Sandy H.
Family Insurance

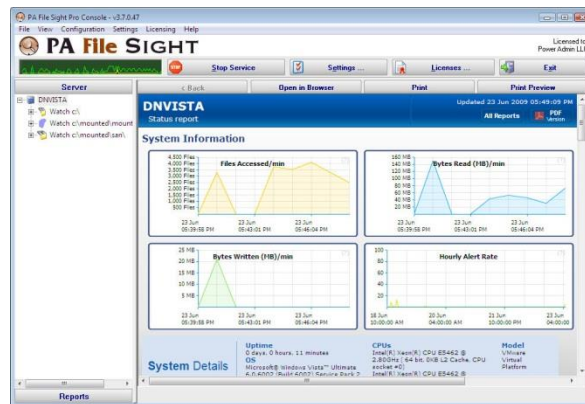

“We appreciate all your **hard work and dedication** to getting the problem resolved. Wish more companies had the support that you guys offer.”

- Todd W.
Beasley Allen, USA

PA File Sight seamlessly audits files access from multiple stations & alerts managers when set parameters are breached.

Users can automatically be completely blocked from the server.

PA File Sight features advanced reporting tools and visual graphs and charts to help IT managers perform detailed file auditing.

PA File Sight does not require Windows auditing or any other auditing systems to generate data. This helps ensure great server performance.

Benefits

- **Invisible Operations:** PA File Sight is equipped with resource usage throttling, allowing for file auditing that will not slow down the network or server.
- **Quick report generation:** PA File Sight generates full audit reports in seconds instead of minutes, reducing wait time and streamlining operations.
- **Advanced reporting:** Schedule reports to be generated automatically with an optional URL emailed to you.
- **Detailed Information:** Get the user account, and the IP address/computer name the user accessed files from.

About

Power Admin, LLC has been building professional grade system monitoring products for many years. Our products are used by Fortune 500 companies, government entities and educational institutions around the world.

All Power Admin products are designed by IT professionals who understand the frustrations of working with sub-par software that fails to meet expectations. Power Admin promises to offer only quality, reliable software after it has been fully tested in the field by IT professionals.
